

emTube - YouTube video player

Contributed by NokiaVista Support
Last Updated Sunday, 20 January 2008

emTube is an application for Symbian S60 3rd edition phones that allows you to:

- Search and browse videos on YouTube.
- Download selected videos onto your phone.
- Stream FlashVideo files directly from YouTube.
- Play local FlashVideo files.

Other features:

- Audio and position control during playback.
- Normal and full screen (portrait and landscape mode) video playback.
- Ability to use built in accelerometer to rotate video between portrait/landscape mode
